

P3

Problem Statement:

PL/SQL with Cursor: merge data from N_RollCall into O_RollCall; skip existing rows.

Code:

```
-- P3: Merge N_RollCall into O_RollCall (MySQL style using INSERT ... SELECT)
CREATE TABLE O_RollCall (
    roll_no INT PRIMARY KEY,
    student_name VARCHAR(100)
);

CREATE TABLE N_RollCall (
    roll_no INT PRIMARY KEY,
    student_name VARCHAR(100)
);

-- Insert from N into O skipping existing
INSERT INTO O_RollCall (roll_no, student_name)
SELECT n.roll_no, n.student_name
FROM N_RollCall n
LEFT JOIN O_RollCall o ON n.roll_no = o.roll_no
WHERE o.roll_no IS NULL;
```
